SKILLS

• FRONTEND:

HTML, CSS, JavaScript, TypeScript,
React, Angular, Redux (incl. Redux
Toolkit & RTK Query), RxJS, Tailwind
CSS, Bootstrap, Material UI, Atomic
Design Architecture, Capacitor

• BACKEND:

Node.js, Express, NestJS, PHP,
Laravel, REST APIs, Serverless

• DATABASE:

PostgreSQL, MySQL, MongoDB,
Prisma, Sequelize, TypeORM,
Mongoose

• DEVOPS & TOOLS:

Docker, Linux, Bash, Git, CI/CD,
Coolify, Networking Basics

• TESTING:

Jest, Jasmine, Karma

• ARCHITECTURE & PATTERNS:

Domain-Driven Design (DDD),
Hexagonal Architecture (Ports &
Adapters), CQRS, Event-Driven
Architecture, Layered Architecture,
OOP Design Patterns

PROFILE

Full Stack Developer with two years of experience specializing in Angular, React, TypeScript, Node.js, and NestJS and more. Proficient in scalable software architectures (DDD, Hexagonal Architecture, CQRS) and deployment workflows using Docker, Linux, and CI/CD pipelines. Committed to continuous learning with expanding expertise in AWS and cloud technologies

WORK EXPERIENCE

Hyperion

Full Stack Software Programmer
September 2025 - PRESENT

- Contributed to developing a digital services platform for social media content and publishing across frontend and backend, initiated frontend architecture refactoring for improved maintainability, and implemented key features while collaborating closely with QA to ensure quality standards.

FullStackHQ

Full Stack Developer
September 2024 - September 2025

- Led the architecture and development of a monolithic email client using DDD, Hexagonal Architecture, CQRS, and Event-Driven principles across multiple bounded contexts, while delivering full-stack features with React (Atomic Design and advanced Redux patterns) and Node.js, setting up scalable DevOps environments using Docker, Linux, and Coolify for QA/testing deployments with secure network configurations, and handling code reviews, library integration, and R&D for third-party service providers.

Geoplan Philippines - Distributor & Systems Integrator

System Developer

NOV 2023 - September 2024

- Developed and maintained full-stack applications with comprehensive testing for code reliability, while mentoring junior developers and establishing development standards to enhance team efficiency, configuring Linux servers for software deployment, and managing client communications for RFCs and project updates.

EDUCATION

KODEGO PH

MAY 2023 - AUG 2023

- Fullstack Web Development
Bootcamp

AMA COMPUTER COLLEGE

SEPT 2015 - MAY 2022

- Bachelor of Science in
Information Technology
